

Referee reports

All applicants who are offered an interview must provide 2 original referee reports on the [MNHHS template](#). MNHHS does not accept referee reports on other templates.

To avoid missing out on a position, it is important that you carefully follow the below requirements.

If you are having difficulty contacting your clinical referee, your first point of contact should be the School of Nursing/Midwifery at your university. If after this, you are still having difficulty obtaining referee reports, you should contact the Graduate Recruitment Coordinator at the facility of your interview.

Referees must meet the following criteria:

1 referee report must be:

- a nursing/midwifery clinical facilitator from the applicant's final year of study or nurse unit manager/preceptor who has been directly responsible for the applicant's clinical placement supervision for 2 weeks or more full-time (or a minimum of 80 hours placement) and has direct knowledge of clinical performance.

2nd referee report is required from:

If currently employed or have been employed in the last 2 years:

- a current line manager (or previous line manager from within the last 2 years, if not currently employed) who has a direct supervisory role. This does not need to be a nursing/midwifery position.

If not currently employed:

- a supervisor for a volunteer position (e.g. St John's Ambulance, Red Cross, sports coaching). The referee must be a direct supervisor of the applicant.

or

- a nursing/midwifery clinical facilitator from the applicant's final year of study or nurse unit manager/preceptor who has been directly responsible for the applicant's clinical placement supervision for 2 weeks or more full-time (or a minimum of 80 hours placement) and has direct knowledge of clinical performance.
